COMPANY HISTORY:

Established in 1986 by Karl Toth, Panagon Systems has remained a low-profile organization producing OEM aftermarket replacement hydraulic piston pumps, transmissions, motors and spare parts. Based in Macomb, Michigan, we manufacture aftermarket hydraulic piston pumps and parts of a large variety of current and obsolete components.

When it comes to superior aftermarket replacement piston pumps and parts, there's

only one place to turn; Panagon Systems. As the largest aftermarket hydraulic piston pump manufacturer in North America, we ensure quality every step of the way.

UNIQUE PRODUCTS/SERVICES:

Panagon Systems manufactures everything in house including machining, broaching, lapping, honing, grinding, building, painting and testing of pumps and ship all over the world from our facility.

SUPPORTING MEMBER SPOTLIGHT: PANAGON SYSTEMS

We maintain a high volume of spare parts in our inventory. Our turn around time on pumps, motors and transmissions is targeted to be ready for shipment after 24 hours of receipt of order.

Panagon also offers repairs services. We do not charge for evaluation and a detailed itemized report will be completed and submitted for approval.

**NEW PRODUCTS/TECHNICAL CAPABILITIES:**

Panagon has the capability to reverse engineer obsolete products. With our Engineering and Technical background we can take a part, complete a 3-D model, develop a print and manufacture the part in our facility.

We have developing techniques on repairing

broken down Tokimec pumps, saving money. The cost of repair is cheaper than new. Call our team for more information.

Our Team at Panagon Systems has over 75 years of experience. For more information, visit our website at www.panagonsystems.com. Also you can contact our Sales Team at sales@panagonsystems.com or at 800-500-8423 for any questions.

WHY WE ARE MEMBERS OF ESA:

We belong to the ESA because we value being a part of such a great group of individuals and companies that mirror the type of company that we are, that have the same company ideals, and business values that we try to represent on a daily basis.

BENEFITS OF BEING MEMBERS OF ESA:

We get support, business opportunities, comradery, and exposure in the hydraulic industry from the members of ESA.
